

Synco™ 200

Universal Controllers

RLU2...

- With programmed standard applications
- Freely programmable controller, for optimum adaptation to the relevant type of plant
- P-, PI, or PID mode
- Menu-driven operation

Use

For use on basic to complex ventilation, air conditioning and chilled water plant. The universal controllers are designed to handle the following controlled variables: Temperature, relative/absolute humidity, pressure/differential pressure, airflow, indoor air quality and enthalpy.

Functions

Operating modes	<ul style="list-style-type: none">• Selection of operating mode via status inputs: Comfort, Economy, Protection• Display of current operating mode (Comfort, Economy, Protection)
Setpoints	<ul style="list-style-type: none">• With each sequence controller: Individually adjustable heating and cooling setpoints (or maximum and minimum setpoints) for the Comfort and Economy modes• Predefined room temperature setpoint with room unit or setpoint readjuster (passive)• With each sequence controller: Predefined setpoint with remote setpoint adjuster (active or passive)• Room temperature setpoint with summer and/or winter compensation• With each sequence controller: Setpoint shift depending on sensor signal, selectable start and end points
Universal inputs	Universal inputs for: <ul style="list-style-type: none">• Passive or active analog input signals of various measured values (°C, %, --)• Digital input signals (potential-free contacts)
Control functions	<ul style="list-style-type: none">• Universal controller (sequence controller) for 2 heating sequences (reverse acting) and 2 cooling sequences (direct acting), can be used as a controller providing P-, PI or PID mode, or as a differential controller• Controller can be configured as a room/supply air temperature cascade controller with limitation of the supply air temperature• Each sequence can be assigned modulating control (modulating output, step switch, mixed air damper/heat recovery equipment) and a pump. 2 sequences can act on the same modulating control (e.g. priority cooling/dehumidification)• General limitation (minimum/maximum with PI mode per sequence controller, either as absolute limitation, e.g. for the supply air temperature or supply air humidity), or as relative temperature limitation (e.g. maximum limitation of the room/supply air temperature differential). Limitation acts on all sequences. Minimum limitation can be set to a lower setpoint while cooling is on (e.g cooling with DX cooler battery)• Sequence limitation with PI mode per universal controller, can be defined as minimum or maximum limitation. Limitation acts on a single sequence (e.g. heat recovery anti-icing protection or maximum limitation of the heating coil's return temperature)• The mixed air temperature controller controls the mixed air temperature via the air dampers• Locking of individual sequences• Digital input (heating limit switch, from a heating controller) for changing the control strategy (room-supply air temperature cascade control), configurable

Switching and supervisory functions

- 2-stage frost protection (modulating/2-position) or frost protection thermostat (heating sequences delivering 100 % output, fault relay for switching off the fans) (with RLU220 only indication)
- Control of pumps, constantly ON at low outside temperatures, ON according to load sequence controller (not with RLU220); periodic activation of pump (pump kick)
- Control of an analog output (not with RLU202). Configurable external presetting (controller used as a pure signal converter). Minimum and maximum position, invertible.
Minimum limitation at low outside temperatures
- Control of mixed air dampers or heat recovery equipment with maximum economy changeover (not with RLU202), startup function at low outside temperatures
- Control of a multistage aggregate with a step switch, with a maximum of 6 steps and a modulating output.
The switching on/off points of each step can be adjusted. Adjustable delay times. Configurable external presetting (controller used as a pure step switch). Modulating output with minimum and maximum position, invertible (only with RLU236)
- Control of a multistage aggregate with a step switch, with a maximum of 2 steps and a modulating output.
Functions as described above (not with RLU220)
- Control of a linear multistage aggregate with a step switch, with a maximum of 6 steps and a modulating output.
Fixed assignment of switching on/off points to the load. Adjustable delay times and priority changeover. Configurable external presetting (controller used as a pure step switch). Modulating output for load assignment to the steps, with minimum and maximum position, invertible (only with RLU232 and RLU236)
- Control of a binary multistage aggregate with a step switch, with a maximum of 4 relays for 15 steps and a modulating output.
Fixed switching on/off points with binary switching logic. Adjustable delay times. Configurable external presetting (controller used as a pure step switch). Modulating output for load assignment to the steps, with minimum and maximum position, invertible (only with RLU232 and RLU236)
- Control of a modulating 3-position actuator. Configurable presetting (controller used as a pure analog/3-position converter) (only with RLU202 and RLU222)
- Delivery of a passive measuring signal as an active signal for use by other controllers

Type summary

Type reference	Universal inputs	Digital inputs	Positioning outputs	Switching outputs	Number of control loops
RLU202	4	1	0	2	1
RLU220	4	1	2	0	1
RLU222	4	1	2	2	2
RLU232	5	2	3	2	2
RLU236	5	2	3	6	2

Accessories

Name	Type reference
Mounting frame for flush panel mounting (consisting of 1 small frame, 1 large frame, 2 hexagonal spacers, 4 fixing screws, Mounting Instructions)	ARG62.201

Ordering

When ordering, please give name and type reference of the controller, e.g.:
Universal controller **RLU236**.

The products listed under "Accessories" must be ordered as separate items.

Equipment combinations

For equipment combinations, refer to the Basic Documentation P3101 or to the document covering the selected application.

Product documentation

<i>Document type</i>	<i>Document number</i>
Basic Documentation: Universal Controllers RLU2...	CE1P3101en
Instructions Set (mounting, commissioning, operation)	74 319 0424 0
Declaration of Conformity (CE): RLU2...	CE1T3101xx
Environmental Declaration: RLU202, RLU220, RLU222	CE1E3101en01
Environmental Declaration: RLU232 and RLU236	CE1E3101en02

Technical design

Each controller offers up to 45 ready programmed applications. When commissioning a plant, the relevant basic type must be entered. All associated functions, terminal assignments, settings and displays will then automatically be activated and parameters that are not required will be deactivated.

In addition, each type of universal controller has 2 empty applications loaded:

- 1 for basic type A (ventilation controller)
- 1 for basic type U (universal controller)

With the help of the built-in operation or the OCI700.1 service tool, the controller affords:

- Activation of a programmed application (refer to "Programmed standard applications")
- Modification of a programmed application
- Free configuration of applications
- Optimization of the controller settings

For operating actions of the functions, refer to the Basic Documentation.

Mechanical design

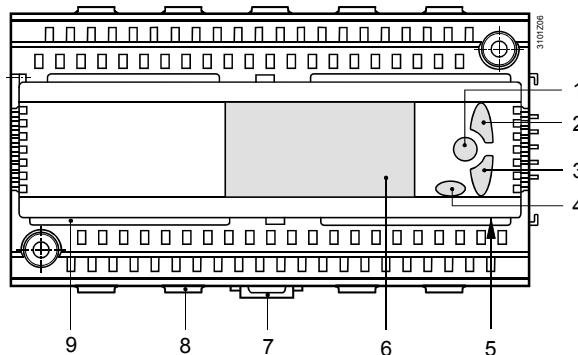

The universal controller consists of terminal base and controller insert with built-in operation.

The terminal base can be fitted to a DIN mounting rail or is screwed directly on a flat surface. It consists of a plastic housing with 2 terminal levels.

The controller insert engages in the terminal base. It consists of a plastic housing which accommodates the printed circuit boards.

Controller operation is fully integrated.

Operating, display and connecting elements

Legend

- | | |
|---|---|
| 1 | OK button for confirming the selected menu line or the value entered |
| 2 | Navigation button, upward (+) for selecting the menu line or changing the value |
| 3 | Navigation button, downward (-) for selecting the menu line or changing the value |
| 4 | ESC button for returning to the previous menu or for rejecting the value entered |
| 5 | Connection facility for the service tool (RJ45 connector) |
| 6 | Display |
| 7 | Catch for fitting the controller to a top hat rail |
| 8 | Fixing facility for a cable tie (cable strain relief) |
| 9 | Rest for the terminal cover |

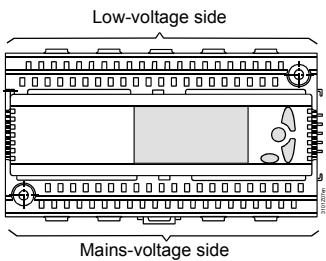

Engineering notes

- The controller operates on AC 24 V. Operating voltage must conform to the requirements of SELV/PELV (safety extra low-voltage)
- The transformers used must be safety isolating transformers featuring double insulation to EN 60 742 or EN 61 558-2-6; they must be suited for 100 % duty
- Fuses, switches, wiring and earthing must be in compliance with local regulations
- Sensor wires should not be run parallel to mains carrying wires that power fans, actuators, pumps, etc.
- It is recommended to use the standard applications provided. Specific plant situations may require certain adaptations however

Mounting and installation notes

- Controllers and extension modules are designed for:
 - Mounting in a standard cabinet to DIN 43 880
 - Wall mounting on an existing top hat rail (to EN 60715-TH35-7.5)
 - Wall mounting with 2 fixing screws
 - Flush panel mounting with ARG62.201 mounting frame
- Not permitted are wet or damp spaces. The permissible environmental conditions must be observed
- Disconnected the system from the power supply prior to mounting the controller
- **The controller insert must not be removed from the terminal base!**
- All connection terminals for protective extra low-voltage are located in the upper half of the unit, those for mains voltage at the bottom
- Each terminal (spring cage terminal) can accommodate only 1 solid wire or 1 stranded wire. For making the connections, the cables must be stripped for 7 to 8 mm. To introduce the cables into the spring cage terminals and to remove them, a screw driver size 1 is required. Cable strain relief can be provided with the help of the fixing facility for cable ties
- The controller is supplied complete with Installation and Operating Instructions

Commissioning notes

- The configuration and parameters of the standard applications offered by the controller can be changed any time by service staff who have been trained by HVAC Products and who have the required access rights, either locally or online/offline with the service tool
- During the commissioning process, the application is deactivated and the outputs are in a defined off state
- On completion of the configuration, the controller automatically makes a new start
- When leaving the commissioning pages, the peripheral devices connected to the universal inputs (including the extension modules) are automatically tested and identified. If a peripheral device is missing, a fault status message will be delivered
- If adaptions to specific plants are required, they must be recorded and the documentation kept inside the control panel
- For the procedure to be followed when starting up the plant for the first time, refer to the Installation Instructions

Disposal notes

The device is classified as waste electronic equipment in terms of the European Directive 2002/96/EC (WEEE) and should not be disposed of as unsorted municipal waste. The relevant national legal rules are to be adhered to. Regarding disposal, use the systems setup for collecting electronic waste. Observe all local and applicable laws.

Y...	Control or status outputs, analog DC 0...10 V
Q...	Potential-free relay outputs for AC 24...230 V
N1, N2	Neutral conductor connection for radio interference suppression elements

Notes

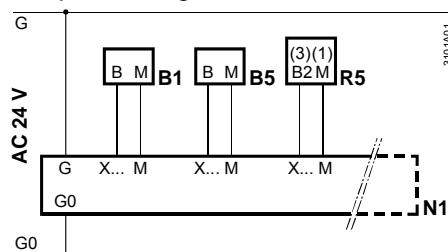

- Each terminal (spring cage terminal) can only accommodate 1 solid wire or 1 stranded wire. Double terminals are internally interconnected
- If a 3-position AC 230 V actuator is used, the radio suppression element must be activated:
Connect terminal N1 to the neutral conductor and fit a wire link between N1 and N2 (see connection diagram 5)

Controller- / basic type	Application no. / description	Plant diagram / connection diagram
RLU236 A05	<p>ADC005 LU3 HQ Extract air (room) temperature control with electric air heater battery and DX cooler battery.</p> <p><i>Options:</i></p> <ul style="list-style-type: none"> • Minimum and maximum limitation of the supply air temperature • Outside temperature-dependent functions • Remote setpoint readjuster • 4-stage electric air heater battery • 2-stage DX cooler battery • Comfort / Economy changeover • Comfort / Protection Mode changeover (time switch) 	<p>The diagram shows a supply air system. Air enters from the left through a filter (F1) and passes through a variable air volume (VAV) box. The air then flows through a duct with a damper (D1) and a coil (C1). From the coil, the air splits into two paths: one going to a hot water heating coil (F2) and another going to a DX cooler battery (B1). The air then passes through a final coil (C2) before exiting through a fan (M1). Control logic includes a remote setpoint readjuster (R5), frost protection (S5, S6), and comfort/economy changeover (S1).</p>
RLU236 A06	<p>ADC013 LU3 HQ Supply air temperature control with electric air heater battery and DX cooler battery.</p> <p><i>Options:</i></p> <ul style="list-style-type: none"> • Room temperature cascade control • Outside temperature-dependent functions • Remote setpoint readjuster • 4-stage electric air heater battery • 2-stage DX cooler battery • Comfort / Economy changeover • Comfort / Protection Mode changeover (time switch) 	<p>This diagram is similar to the previous one but includes room temperature cascade control (B5). The logic adds a room temperature sensor (S1) and a room air valve (Y1) to modulate the air flow based on the room's temperature.</p>
RLU236 A07	<p>ADC008 LU3 HQ Extract air (room) temperature control with hot water air heating coil, frost protection, DX cooler battery and fan release.</p> <p><i>Options:</i></p> <ul style="list-style-type: none"> • Minimum and maximum limitation of the supply air temperature • Outside temperature-dependent functions • Remote setpoint readjuster • 4-stage DX cooler battery • Comfort / Economy changeover • Comfort / Protection Mode changeover (time switch) 	<p>This diagram includes a hot water air heating coil (F3) instead of a DX cooler. It also features frost protection logic with a bypass valve (Y3) and a pressure switch (M1) to prevent freezing.</p>
RLU236 A08	<p>ADC017 LU3 HQ Supply air temperature control with hot water heating coil, frost protection, DX cooler battery and fan release.</p> <p><i>Options:</i></p> <ul style="list-style-type: none"> • Room temperature cascade control • Outside temperature-dependent functions • Remote setpoint readjuster • 4-stage DX cooler battery • Comfort / Economy changeover • Comfort / Protection Mode changeover (time switch) 	<p>This version adds room temperature cascade control (B5) to the hot water heating coil system, similar to the A06 model.</p>
RLU236 A09	<p>AEDL01 LU3 HQ Supply air temperature and supply air humidity control (r.h.) with closed-circuit heat recovery system, hot water heating coil, frost protection, spray humidifier and fan release.</p> <p><i>Options:</i></p> <ul style="list-style-type: none"> • Room temperature cascade control • Outside temperature-dependent functions • Comfort / Economy changeover • Comfort / Protection Mode changeover (time switch) 	<p>This diagram includes a closed-circuit heat recovery system (M6, M7, Y6, Y7) and a spray humidifier (M8). It also features frost protection logic with a bypass valve (Y3) and a pressure switch (M1).</p>
RLU236 A10	<p>AEFL01 LU3 HQ Supply air temperature and supply air humidity control (r.h.) with closed-circuit heat recovery system, DX cooler battery, hot water heating coil, frost protection, spray humidifier and fan release.</p> <p><i>Options:</i></p> <ul style="list-style-type: none"> • Room temperature cascade control • Outside temperature-dependent functions • 2-stage DX cooler battery • Comfort / Economy changeover • Comfort / Protection Mode changeover (time switch) 	<p>This diagram includes a DX cooler battery (B15) instead of a hot water heating coil. It also features frost protection logic with a bypass valve (Y3) and a pressure switch (M1).</p>
