But the industry faces several challenges before it can capitalize on the trend. Many believe that the industry needs to do a better job educating consumers about the pet food they buy. Others feel that pet food regulations are outdated and overly harsh. Either way, the industry has some catching up to do before it can fully capitalize on the new markets. Pet Food industry has different levels of responsibility for the potential pet food contamination. The following levels of responsibility are listed from most responsible to least: (1) Manufacturer: is responsible for the production of pet food, (2) Packager: is responsible for packing the product (most likely) and labeling, (3) Distributor: is responsible for distributing the pet food, and (4) Manufacturer's Representative: is responsible for representing the manufacturer and making sure that the quality of the product is maintained throughout the production process.
