It has to have such attributes: it has to be a Firefox add-on; it cannot be downloaded from Mozilla site. it should be available as extension for all installed Firefox versions. It should store information in localStorage or sessionStorage. EDIT: I've thought about this: here on Stackoverflow we usually use code snippets, so I tried to give you some sample code, and mentioned how it works. A: Tab Hunter comes to mind but you can use whatever you like (it's just a little script that checks on some network activity periodically). [Classification of organic field disorders of the mouse brain according to their representation in the visual system (author's transl)]. The position of cortical areas and their distribution of the various
