What's new:

Introduction Hello, I'm Tarnished Games' engineer (support department) and producer. Let's start with the RPG genre that influenced us throughout development, and as of the time we started. In the last 15 years, the RPG genre has dramatically changed thanks to its implementation into the console development environment. This change in price and distribution models became a positive symbol for the game development industry and has brought a lot of changes to how we work. In the light of these phenomena, programmers changed their ways of working and studios began to evolve. This is the reason why we thought we should not give up on the traditional RPG elements like the party and the grid, but rather try and find new ways to implement them. **Concept A** new type of **Character** you can customize Even though the RPG genre is understood as a genre that's centered on exploration, battles and growth, we decided to further enhance the game by creating a **Role-playing Game** with fast paced action and an **MMO** like online mode. Exciting and fast-paced combat, with a strong focus on skills. A
world full of excitement and challenges: A vast open world with a
variety of situations, places and elements to discover. A style based
on action and combat, with a strong focus on horizontal cut scenes.
The battle transition system: Unlikely to find the direction of
combat, but anticipating soon to the possibility of new enemies
appearing. Multiplayer gameplay: Players can join or leave the game
in the middle of the play field via the Steam Cloud. This allows
players to play online, off-line and even through the homes network.
You can even take your save and go to a friend's house to continue
a game. Classical battle system. Each player can call monsters to aid
them through skills or casting spells. While many of the previous
RPG's made use of artificial obstacles in order to increase their
difficulty, we decided to use the genre-typical components of the
RPG like having to collect items and can't always heal yourself after
a battle. However, all the skills and spells in the RPG'
