Is Suffering From A Barrel of Trouble What if the world just handed over the largest economy in Latin America to an angry populist? This election season has seen the downfall of Brazil's popularly elected president and it is not even over yet. The Brazilian economy is going through turbulent times and citizens are not even enjoying the electoral process as they were in the last two elections. It has been a particularly bad year for Brazil because the world has mostly ignored the country amid the election cycle. This uninterest has allowed it to take advantage of the few investors that remain interested in the country, thus prompting Brazil's stock market to hit a record high in early 2018.

What's left of the "Bolsonaro Mistake" in Brazil? When former Brazilian president and presidentelect Jair Bolsonaro says no one has been "mistaken" about him or the dire state of the economy, it refers to his opponents. Bolsonaro is one of the most ardent social conservatives in Latin America. He espouses a hard right-wing,

militarized version of government

that is buoyed by the region's conservative surge. But in his first year, many Brazilians have called him "Brazil's Donald Trump," and the new president has not managed to outrun the initial comparisons even though the country faces far worse problems than the American economy. Bolsonaro's right-wing policies include scaling back the country's

## environmental policy, loosening gun restrictions, and introducing new laws to limit media freedom. His views on race and gender are also extremely regressive, pushing to put women back into traditional "macho" roles and praising a 1994 military dictatorship that tortured, killed and jailed thousands of political opponents.
